

# Amol Dadarao Rathod

+91-9096293703 — [Email](#) — [LinkedIn](#) — [GitHub](#)

## TECHNICAL SKILLS

---

- **Languages:** Python, C++, C
- **Core Concepts:** Data Structures & Algorithms, OOPs, Operating Systems, Computer Networks, System Design
- **Domains:** Artificial Intelligence (LLMs, RAG, NLP), Data Science, Machine Learning, Deep Learning, Cloud Computing, Web Development
- **Tools & Databases:** Vector Databases, Oracle Autonomous Database, Git/GitHub, n8n, Oracle Cloud, Docker, Hugging Face, Vercel

## PROJECTS

---

### Vidhoor - Legal AI Copilot — [Live Demo](#)

Mar 2026 – Present

Tech Stack: Llama 3.1 8B (Cerebras), RAG, Vector DB, Oracle DB

- Engineered an AI-powered legal assistant utilizing **Retrieval-Augmented Generation (RAG)** and Vector Databases, delivering real-time insights with ultra-low latency inference speeds of **2,350 tokens per second**.
- Processed, trained, and indexed **851 pages** of comprehensive Indian legal frameworks, including the Indian Constitution, BNS, BNSS, IPC, IT Law 2000, and Data Privacy Laws.
- Hosted the architecture on **Oracle Autonomous Database** leveraging Hybrid Search capabilities.
- Implemented strict data security measures, including End-to-End Encryption (E2EE) and Personally Identifiable Information (PII) handling/redaction.

### Interview.io - AI Interview Prep Platform

Jan 2026 – Present

Tech Stack: Llama 3.1 8B (Cerebras), Python

- Developed a career preparation platform enabling students to practice via **AI-driven mock interviews** tailored to specific technical domains like Software Engineering and Data Science.
- Built an automated resume parser that provides instant, actionable feedback on formatting and keyword optimization.
- Integrated a “Codex” module featuring curated Data Structures and Algorithms (DSA) questions covering arrays, trees, and dynamic programming.
- Designed a customized roadmap generation feature that curates tailored study resources and reference links based on the user’s career goals.

### AI Receptionist

Jan 2026

Tech Stack: DeepSeek R1, Vapi, n8n, Automation Workflows

- Developed an intelligent voice receptionist powered by advanced reasoning models, a project that successfully propelled the team to the finals of the **OpenAI Academy x Nxt Wave Buildathon**.
- Enabled the seamless handling of real-time appointment booking, searching, and rescheduling for users.
- Orchestrated **automated workflows** using REST APIs and Webhooks to extract user data, sync appointments to **Google Calendar**, log interactions in **Google Sheets**, and trigger personalized confirmations via **Gmail API** and WhatsApp.

## CERTIFICATIONS & ACHIEVEMENTS

---

- **Certifications:** [Career Essentials in Generative AI \(Microsoft\)](#), [GitHub Foundations Part 1 & Part 2](#), [Supervised & Unsupervised Machine Learning](#).
- Active competitive programmer with 200+ problems solved on LeetCode focusing on Data Structures and Algorithms.
- Participant, TENET Hack 25 & Innervex X (Army Institute of Technology).

## EDUCATION

---

### P.E.S. Modern College of Engineering

Pune, MH

B.Tech. in Artificial Intelligence and Data Science

July 2024 – Expected July 2028

Current Year: Third Year (T.Y B.Tech)

**CGPA: 9.00**

**Key Coursework:** Data Structures (DSA), Object-Oriented Programming (OOP), Operating System (OS).
